

containers

We are a wholly-owned & operated West Australian based company with experience in the container industry spanning over 30 years. Our core business revolves around shipping container sales & hire, container storage and container modifications. If you are in the market to purchase a sea container - new or used - we offer a large selection at very competitive prices. If you prefer to hire, we also have a large range of containers in our lease fleet to choose from.

Shipping containers are a cost effective, highly portable alternative for clients requiring storage facilities, property sheds, permanent and temporary accommodation, cellars, cool rooms, freezers and much, much more. To find the container that best suit your needs we have put together this printable guide. If you require any further information get in touch with us.

SHIPPING CONTAINERS FOR SALE OR HIRE

Small Containers

Small shipping containers are used on residential premises as tool sheds or on commercial sites as portable workshops or equipment stores. They can be easily moved and stacked with a standard forklift.

2 x 10 foot containers can be purchased as a connected set. Small container sets of 6, 8 and 10 foot are also available.

Shipping Container	Common Modifications	Capacity	Max. Cargo	Container Weight	Internal Dimensions			External Dimensions		
					Length	Width	Height	Length	Width	Height
6'GP	Personnel door	4.3m ³	2,000kg	730kg	1.69m	1.47m	1.75m	1.83m	1.55m	1.9m

	Custom painting									
	Ventilation									
	Insulation									

Standard Containers

Standard shipping containers are the most commonly used containers in the shipping and freight industry and have many applications when modified.

Standard types include general purpose (GP), pallet wide (PW) accommodating 2 standard size pallets side by side, high (HC) cube for an extra foot in height or PWHC for extra width & height.

Standard containers are available with double cargo doors at one or both (DD) ends or side opening doors (OS).

Shipping Container	Common Modifications	Capacity	Max. Cargo	Container Weight	Internal Dimensions			External Dimensions		
					Length	Width	Height	Length	Width	Height

	Insulation									

Refrigerated Containers

Refrigerated shipping containers are used for storage and transport of frozen goods such as seafood or ice cream and for chiller goods like fruit, dairy, flowers or anything that requires strict temperature control.

Each container is fully insulated with a stainless steel interior, aluminium "T" floor flow for ease of cleaning and washing out. Controls are simple to operate and are adjustable between -25°C +25°C.

Shipping Container	Common Modifications	Capacity	Max. Cargo	Container Weight	Internal Dimensions			External Dimensions		
					Length	Width	Height	Length	Width	Height
20'RFR	Personnel doors	28.4m ³	27,450kg	3,030kg	5.38m	2.26m	2.27m	6.06m	2.44m	2.59m

	Security lock box									

Bulk Containers

Open top (OT) containers are ideal for loading large quantities of small or granular cargo from above.

Flat rack (FR) containers suit over-sized or over-weight items such as heavy machinery.

Tank Containers allow for the secure and safe storage and transport of powders, liquids and gases.

Shipping Container	Door Openings		Capacity	Max. Cargo	Container Weight	Internal Dimensions			External Dimensions		
	Width	Height				Length	Width	Height	Length	Width	Height
20'OT	2.34m	2.26m	32.5m ³	28,150kg	2,330kg	5.9m	2.35m	2.35m	6.06m	2.44m	2.59m
